Dear Customer,

In order to address continuing change in our industry, Idyllwild Water District will be reviewing and updating its policies regarding water delivery and sewage disposal. This process will involve rate changes and modifications to our existing charges. The first step is our water usage rates. The following schedule is proposed and will be discussed at a Public Hearing on August 20, 2014 at 6:00 p.m. at the IWD boardroom-25945 State Hwy. 243-Idyllwild, CA. The proposed usage rates would become effective September 1, 2014 and be reflected on the October, 2014 billing.

The goal is to keep the water product delivery system in prime functioning condition and capital expenditures in balance.

The Board will review the budget each year to assure that our rates are reasonable to cover our costs of water delivery and sewer service to our customers, and we will continue to seek alternative ways to insure overall cost efficiencies.

The District has also asked that our customers reduce the amount of water consumption to help address the California drought. We greatly appreciate all the efforts that our customers have made, and we hope that through continued conservation we will make it through our dry summer months.

The only change to the rates is the first usage tier is now split into two parts. There will still be no charge for the first usage tier shown above for all rate codes. For most residential customers that have an R1 rate code, this would be the first 1-250 cubic feet of water. Based on consumption, the fee for usage above 250 cubic feet will now be charged in addition to the monthly base. Other rate codes will also see the increase.
